1-COOL

METAL WORKING FLUID SERIES

1-COOL AQUACUT 150

Premium mineral coolant oil

PREMIUM MINERAL COOLANT OIL SUITABLE FOR FERROUS AND NON FERROUS AND THIER ALLOYS

PERFOMANCE

1-COOL AQUACUT 150 is a coolant cutting fluid developed for use in light to heavy duty machining of ferrous & Non ferrous metal alloys. It is also suitable for general purpose grinding. It contains special lubricity & E.P additives and rust inhibitor, which protects components during machining operation. This product is specially designed to offer better sump life with better tool life

APPLICATION

- Recommended for a wide range of metal working operations.
- Suitable for metal cutting & grinding of ferrous & non ferrous its alloys
- Material Compatibility [Cast Iron, Ferrous and Non ferrous Alloys, Stainless Steels]

CHARACTERISTICS	
Appearance-Concentrate	Clear brown transparent
Density @ 29.5 °C, g/mol	0.840
Emulsion –Appearance	Milky White
Thermal Stability Test	Passes
Cast iron corrosion Test @ 3%, 200 ppm(IP287)	No rust
PH 5% dilution in Distilled water	9.4
Refractometer Reading x Factor	1

1-COOL

METAL WORKING FLUID SERIES

1-COOL AQUACUT 150

Premium mineral coolant oil

PREMIUM MINERAL COOLANT OIL SUITABLE FOR FERROUS AND NON FERROUS AND THIER ALLOYS

PERFOMANCE

- Excellent cooling and lubricating properties
- High resistance to bacterial attack and hence reduced odour and higher coolant life.
- Stable emulsion even in hard water
- Offers excellent rust protection of multi metal components.
- Nitrite & Chlorine free hence environmentally safe.

RECOMMENED CONCENTRATION	
Application	Concentration %
Grinding	3-5%
General Machining	5-6%
Heavy Duty	5-8%

MIXING GUIDELINES

- While mixing always add oil to water and not the reverse.
- Use good quality water. D.I water gives extended sump life as Hardness and chlorides reduce the product life and corrosion inhibition properties.
- Use clean and sterilized sump before every fresh charge
